STEP

Step 1 of 3 -- Brake Booster Lab

Answer the following questions using ShopKey and provided training materials. Do not proceed to the next section until your instructor has initialed the sign-off at the bottom of this section.

Vehicle Application

MAKE	MODEL	YEAR	ENGINE
TRANSMISSION	PROD. DATE	MODEL CODE	BUILD LOCATION

Technical Service Bulletins (Required)

TSBs Found:

List any TSBs found -- include number and title. If none found, write "none found." Search terms still required.

Search Terms Used:

Required -- list every search term used, even if no TSBs were found.

System Basics -- Research Questions (18 points)

1 Using ShopKey, identify the following torque specifications for the assigned vehicle:

2 pts

Component	Torque Specification (include units)
Brake booster mounting nuts	
Master cylinder mounting nuts / studs	
Vacuum hose fitting (if applicable)	

- 2 Using ShopKey, list all service precautions that apply when removing the brake booster on the assigned vehicle.

2 pts

- 3 Using ShopKey and training materials, summarize the air tightness check procedure for the vacuum brake booster.

2 pts

- 4 Using ShopKey and training materials, summarize the pedal operation check procedure (without measuring devices).

2 pts

- 5 Using ShopKey and training materials, explain the procedure to measure and adjust the master cylinder pushrod length.

2 pts

- 6 What is the effect on brake pedal feel and braking performance if the master cylinder pushrod is too short?

2 pts

- 7 What is the effect on brake pedal feel and braking performance if the master cylinder pushrod is too long?

2 pts

- 8 What is the effect on braking if the brake booster fails completely? How does the driver experience this failure?

2 pts

- 9 What is the purpose of the one-way check valve on a vacuum brake booster? Describe the procedure to test it.

2 pts

INSTRUCTOR SIGN-OFF -- SYSTEM BASICS (2 POINTS)

Review this section, initial below, and note any corrections. Student may not submit until initialed.
